SEMA Systems Technology ... our new partner

Bohle Machine Tools, Inc. is proud to announce that we are now representing SEMA Systems Technology in North America. In the past, Bohle sold and installed 5 large SEMA tube bundling systems in North America.

We build machines to accommodate the tube, bar, and profile stock industry.

Our product line offers:

- Separating systems for tube, bar, and profile stock
- Finishing lines
- 6- and 10-roller straightening machines for tube diameters 3 – 200 mm
- Complete testing lines for tube and bar stock
- Cut-off systems
- Chamfer and end processing systems
- Tube and wire coiling systems
- Packaging systems for round, hex, and square bundles with strapping and wrapping lines
- Custom systems designed to meet your production needs
- Pointer for drawing tags
- 9-roll straightener for tubes and pipes (black material)
- Single and multi tube drawing benches
- 2-roll straightening machines for bars and shafts

Bohle provides sales, service and spare parts from our facility in Plymouth, MI. Please let us know how we can help you develop a solution to cut cost and increase your production.
